16. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS: This two-story Italianate house occupies the southeast corner of Church and High Streets adjacent to the Wesleyan University campus. Buildings on all four corners of the intersection are used by Wesleyan for departmental offices or as fraternity housing. Sited on a rising plot of ground, the building overlooks somewhat more substantial buildings toward the east, Main Street and the Connecticut River.
17. OTHER NOTABLE FEATURES OF BUILDING OR SITE (interior and/or exterior):

Stained glass windows, center front
Paired brackets along whole cornice, including pedimented gables
Matching window caps with paired brackets, second story

SIGNIFICANCE

18. HISTORICAL OR ARCHITECTURAL IMPORTANCE: Situated near the southern boundary of the Wesleyan University campus, this house has been associated with the college for most of its life. It was used as a residence at first by the Hart and then the Root families. Next it became a home for faculty members as the college began to extend its influence into adjacent neighborhoods in the late nineteenth century. It has served as a dining club, faculty apartments, and departmental offices ever since. It currently houses a student organization (the Wesleyan Argus), and two departmental offices, the Mathematics Department and the Religion Department Annex.

The building is long and narrow, with an added wing and porches. A nineteenth century photograph shows that the northeast tower once was one story taller. On the east facade, an extension of the first floor front room is carried forward on to the porch, making an alcove office there. One of the chief features of note is the extensive wooden brackets that surround the building supporting the cornice. These detailed brackets are displayed in pairs around the whole building. The wooden bracketed lintels, bay windows, and veranda with projecting pediments also add distinctiveness to this clapboarded building.
